

Why VideaAI is Your Dental Practice's Must-Have Investment for This Year

At VideaHealth, we're redefining what's possible in dentistry through AI technology. With the most advanced capabilities on the market, VideaAI is the best-in-class solution for your practice. Here's why:

Unmatched Accuracy & Diagnostic Power

VideaAI leads dental AI with 34 FDA-cleared detections—the most extensive clearance in the industry, uniquely covering patients as young as three years old. For dentists, this means unrivaled accuracy in caries detection, enabling you to confidently diagnose decay earlier and significantly reduce false positives compared to other solutions. With VideaAI, your practice benefits from precise, trustworthy diagnostics that translate directly into better patient outcomes and smarter treatment planning.

FDA Clearance Indications

		 videahealth	Company 1	Company 2
Cleared Indications for Diagnostic Support				
Caries (BW/PA)	Widened Periodontal Ligament (PDL)	11	5	4
Restorative Imperfection (BW/PA)	Attrition (BW/PA)

Calculus (BW/PA)	Pulp Stone (BW/PA)			
Radiographic Bone Level Measurement (BW/PA)	Dens Invaginatus (BW/PA)			
Furcation (BW/PA)				
Historical Treatment Detections for Future Auto-Charting				
Crowns (and material type)	Post and Core	7	3	4
Fillings (and material type)	Bonded Orthodontic Retainer			
Root Canals (and material type)	Braces			
Bridges (and material type)				
Anatomical Detections for Comprehensive Treatment Planning				
Impacted and Crowding Teeth	Mandibular Tori	13	0	0
Maxillary Sinus and Maxillary Tuberosity	Mandibular Condyle			
Mental Foramen	Developing and Erupting Teeth			
Mandibular Canal	Non-matured Erupted Teeth			
Inferior Border of the Mandible	Exfoliating Teeth			

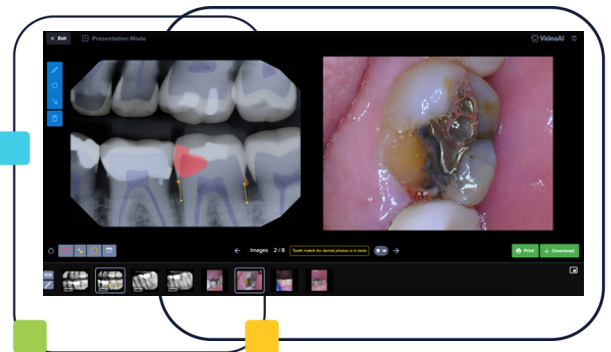

From Diagnosis to Treatment Planning—Seamlessly

VideaAI doesn't stop at detection. Our AI automatically treatment plans and auto charts, so your workflow becomes faster and more efficient. We can say we have all historical treatment detections FDA clearance to all for quick and easy charting? Instead of just identifying a potential cavity, our AI can suggest clinical decision support highlighting opportunities like crowns or scaling root plans, using the most comprehensive and reliable data. We combine multiple algorithms to ensure your patients receive the most accurate care possible.

Guaranteed AI Adoption

VideaHealth has simplified AI for dental teams, making VideaAI intuitive and easy for everyone—from front office staff to clinicians—to use confidently from day one. Our world-class customer support team ensures you're fully backed with personalized guidance, training, and responsive assistance whenever you need it. Practices consistently highlight VideaAI's seamless integration and user-friendly design, empowering your entire team to deliver exceptional patient care without the technical headaches.

"This is changing the face of dentistry. Thank you so much for letting us be a part of it."

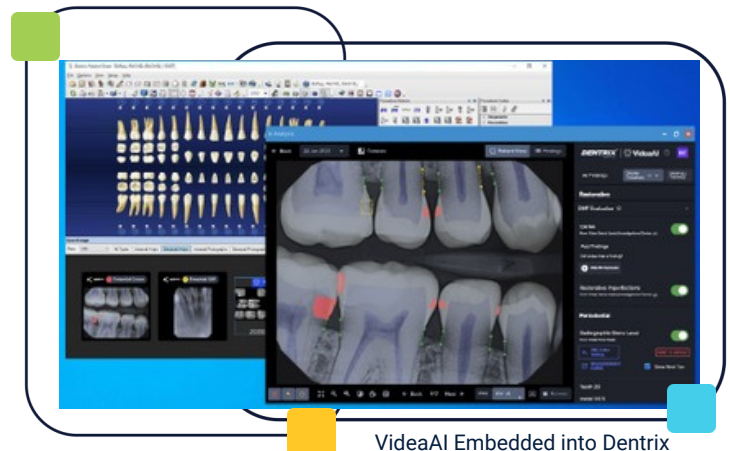

-Dr. Koleilat, Summer Fair Dental

Effortless Integration

VideaAI is designed to fit into your existing systems seamlessly:

- Only AI company fully embedded into Dentrix
- Integrated in 90% of imaging systems
- Compatible with all major practice management systems

Our extensive integrations ensure that no matter what imaging or practice management software your practice uses, VideaAI can help you quickly and efficiently get up and running with clinical AI.

VideaAI Embedded into Dentrix

“Occlusal caries can be hard to spot, and Detect AI helped me confirm some I may have missed. It will also be a great help to our younger hygienists in building their confidence in diagnosing and spotting caries.”

Olivia Palsrud, DDS

Conclusion

VideaAI isn't just another tool—it's a transformative solution for your practice. With unparalleled diagnostic power, automatic treatment planning, seamless integration, and guaranteed adoption, VideaHealth is the clear choice for elevating your dental practice.

Join our mission of helping thousands of dentists provide treatment to millions of patients through the use of VideaAI.
